

Brian was celebrating another year without Partnership

In-house opportunity, Silence Therapeutics, Biotechnology, London
Silence Therapeutics is poised at an exciting time in its growth, and is expanding its IP portfolio as a result of its ongoing efforts in the field of RNAi Therapeutics. They are able to offer an opportunity that is highly varied and one which will require European travel. You will work very closely with R&D departments and enjoy a collaborative environment where you will develop IP strategies in conjunction with scientific staff.

Part Qualified (1-2 Years' Experience), Chemistry, Midlands

A strategically minded practice known for their commercial edge requires a recently qualified attorney to help manage their current work load, as well as adding to their portfolio with additional clients across the chemical and pharmaceutical fields. The practice handles a diverse range of technologies and manages the full lifecycle of their clients' IP, from initial IP capture and invention harvesting, drafting and prosecution through to all ongoing portfolio management and handling any contentious matters that may occur.

Qualified Patent Attorney, Electronics/Engineering, Bristol

Client satisfaction is at the forefront of this firm's ethos, as is departmental connectedness and the provision of an open and supportive working environment. The firm offers its attorneys a great deal of room for professional development and the opportunity to attend a number of CPD and networking events. There is a very meritocratic structure ensuring that progression towards Partnership is both achievable and transparent.

Finalist, Chemistry, London

Fancy working across a variety of subject areas, rather than being focused on just one area alone? This role is for you. The firm encourages the fast development of well-rounded commercial and legal abilities with the goal of helping their attorneys progress up the ladder very quickly. The Partners are deliberately recruiting into a demographic gap which means that whilst there are attorneys who will be both further and less far in their career than the person joining the practice in this role, there will be no internal competition impeding progression.

Nearly/Newly Qualified, Physics, Oxford

Get to grips with your own fair share of work and get your hands dirty with this interesting opportunity offered by a quietly confident firm with very open views on remote/flexi working. You will become acquainted with high profile and high quality clients, and be offered significant responsibility from the off. Your portfolio will include direct clients based both in the UK and overseas, and will consist mainly of start-ups and SMEs – allowing you to work as closely as you like with the inventors, becoming an integral part of their IP plans.

Senior Associate, Electronics/Engineering, Midlands

Enjoy an extremely broad client base and handle innovative technologies originating from a range of fields, including electronics, telecommunications, medical devices, mechanical, semiconductors, software and computer systems. You will have access to a much more varied work portfolio than is normally expected, with endless drafting and prosecution supplemented with more commercial and management focused responsibilities.

Newly Qualified Patent Attorney, Telecoms/Electronics, Hoffmann Eitle, London
As a pan-European firm Hoffmann Eitle can offer a really unique array of experiences to patent attorneys joining their team. Given the close working relationship with the other offices situated across Europe, the workload will be highly diverse across a wide range of technologies. Attorneys are given access to a variety of experiences and, in addition to prosecution and drafting work, you will be encouraged to build first-hand knowledge of oppositions and broader litigation work as well as having control over building your own portfolio, with considerable support from the team.

Trainee Patent Attorney, IT&E, London

Begin your career in the best possible way with access to an individually tailored training and support scheme, an ever changing mix of technologies and an interesting client base. This firm can give you the best of both worlds, offering a close knit and collaborative working environment coupled with the opportunity to work with a leading international client base. They take pride in the level of independence they offer their attorneys, with regular client contact and the chance to build business and represent the firm at networking events.

Finalist, Physics, London

Join an unquestionable force in the industry, with an ever growing list of cutting edge clients originating from across the physics, engineering and electronics fields. There is no risk of you becoming pigeonholed in this role, with the opportunity to work within cross office teams and collaborate on a diverse portfolio of clients, ranging from innovative start-ups and sole inventors, to SMEs and multinational corporations based in the UK, US and Asia.

Part Qualified Patent Attorney, Engineering, Brighton

This firm is commercially driven and takes a hands on approach to all matters, allowing you to gain valuable skills and substantial direct client experience from early on. The firm prides itself on its excellent training scheme, which is facilitated by the friendly and supportive working environment it offers. Remote/flexi working is available so if you're not based in Brighton, don't fancy travelling to the office every day, or prefer to work from a variety of locations – this opportunity could be one for you.

Partner Designate, Electronics, Midlands

Recent internal shifts have resulted in this firm being able to offer an accelerated track to Partnership within a dramatically reduced time frame. You will work with leading names across electronics (and engineering to some extent) both local to the region and further afield, with direct clients and an impressive foreign associate network spread across the world. There is a refreshing approach to BD, with individual budgets allowing you to pursue your own new business interests.

Opportunities for Electronics Attorneys, Leeds/Sheffield/York/Manchester

It's no secret that opportunities for electronics attorneys are rife in the industry at the moment. We're working with a number of firms in the North who are able to accommodate candidates at all levels. Yes, you heard us - from trainee all the way up to Partner. Same clients, same salary, and not to mention the North is a lovely place to live.
