

Missing something?

Part Qualified Patent Attorney, Electronics, London

A firm who has successfully married a close knit and wholly inclusive working environment with a high flying and impressive client base is looking to grow their team with an additional part qualified patent attorney. Their attorneys are given freedom over their own portfolio from very early on, including organising and participating in client meetings (both existing and prospective), developing strategies that will shape the value of their clients' IP (not just stuck in an office writing responses), control over their own budget, and extensive travel overseas.

Nearly/Newly Qualified Patent Attorney, Electronics, Yorkshire

Find a career not just a way to pay the bills with this opportunity based in the beautiful surroundings of Yorkshire. You will work closely with an incredibly varied portfolio of clients ranging from budding inventors looking to protect their first idea to internationally recognised names in industries including telecommunications, electronics, computer systems, networking, medical devices and general engineering. The structure ensures that you won't be hidden away behind Partners, with attorneys at all levels introduced to clients and given an active role in their IP protection.

Qualified Patent Attorney, IT&E, Bristol

Want something different? We understand that this can be difficult when the fundamentals of being a patent attorney rarely change from firm to firm. What can change however is how the firm views its attorneys and their working practices. This firm is incredibly flexible when it comes to fitting in life around work and encourages their attorneys to work smart rather than hard (as long as their targets are being met of course). The Partners are approachable and available, and there's room at their table if that's something you're currently thinking about.

Newly Qualified Patent Attorney, Biotechnology, London

This firm is experiencing a period of change which will open up plenty of opportunity for a new recruit coming in. These changes will enable career advancement up the ladder to Partner for those who really want it, as well as the chance to build upon an already impressive portfolio of multinational clients with a range of interesting technologies. The team is challenged daily with high value contentious work for leaders in the biotechnology field and travel the world representing the firm, speaking at events and attending industry conferences.

Finalist, Life Sciences, London

You will certainly get the wow factor at this firm, with impressive offices, state of the art technology and a highly streamlined management and support function enabling you to really make the most of your career. You will be working alongside dedicated legal specialists from across all areas of IP, offering a truly comprehensive service to your clients and getting involved in areas less commonly trodden by a run of the mill patent attorney. Work spans across both chemistry and biotechnology, ideally requiring a candidate with experience in both, but specialists in one or the other may also be considered.

Finalist, Electronics, London

Variety is the name of the game at this firm, with plenty of work to keep you busy (plus the option to build more), cross departmental teams allowing you to work with technologies not normally within your technical remit, the freedom to target new areas of business (including types of technology, client and country), and encouragement to participate in and speak at industry conferences, seminars and initiatives. The firm pay extremely well and there's an achievable and generous bonus available once you qualify.

Senior Associate, Electronics or Engineering, Midlands

Need a little more space to pursue your own clients? Or perhaps you'd appreciate a little more support and insight into where your career is heading? This firm understands that their attorneys might have different priorities in mind when it comes to their job, and they work hard to make sure everyone is heard and happy with their lot. The salary and clients are what you would expect of a London based role so you won't be missing out on anything if you make the move (as well as probably gaining more disposable income and a considerably shorter commute to boot).

Part Qualified Patent Attorney, Telcos/Software, East Midlands

The regions can offer a wealth of opportunity due to many sources for potential clients being untapped. This firm has made great success through identifying and working with future leaders across a range of fields, alongside securing larger international names through their excellent reputation in the industry. They have an opening for a part qualified patent attorney with an interest in computer technology, information systems and software to join their team and help grow their client base, both locally and overseas. Their salaries are excellent and more than what you can expect in London.

Trainee Patent Attorney, Physics, South

We have a number of different opportunities for firms across the South, including those with multiple offices, for patent attorneys in the early stages of their career. Chances are we'll be able to find something to suit most (if not all) interests with a range of team size, technology mix, and working environment available. It is becoming increasingly more common to move roles before qualification and firms are well equipped to make the move as smooth as possible, as well as covering any clawbacks you may be worrying about.

Qualified Patent Attorney, Chemistry, Cambridge

Enjoy a more relaxed pace of life and join a small but growing team in Cambridge. The office is part of a larger firm meaning you will have access to a fantastic wider support structure and benefit from excellent in-house facilities, including top of the range software systems allowing seamless contact with clients, colleagues across the UK, and for use in remote working. Career progression is achievable and there are guidelines in place to ensure you know exactly where you, where you're going to be and how you're going to get there.

Recently Qualified Patent Attorney, Electronics, Birmingham

If a strong and steady ship is what you're looking for, then this is the firm for you. Their reputation has been built on many years of excellent service, client satisfaction and the ability to evolve to meet the ongoing developments of the IP world. They are in need of someone to be their next generation of Partner who can continue the firm's success through maintaining their core values whilst seeking out new and inventive ways to service their established and prospective client base. If Partnership is not on your mind just yet then there's a fully rounded and challenging role waiting for you in the meantime.

Associate, Electronics, London

Demand for patent attorneys working in electronics has resulted in some firms promising the earth in order to secure candidates over the competition. But do these firms actually deliver? We can't speak for all firms, but we know that this one in particular has a demonstrable track record in working closely, and truthfully, with new hires so that they know exactly what's expected of them (and of the firm) once they join.

For more information or to apply to any of these roles speak to Pete Fellows or Philippa Holland on 0207 903 5019 or email: contact@fellowsandassociates.com.
